

## Activation Lever

Robust and ergonomic handle which locks securely and releases positively.

## Viton or EPDM

Pad and ring seal gaskets available in the industry standard of Viton and EPDM.

## Non Return Valve

Dedicated one-way liquid pathway avoids cross-contamination.

## Industry Standard Build

Rugged construction to survive the challenges of operating in Agricultural, Liquid Handling and Pharmaceutical industries.

1" swivel-type outlet/inlet with NPT thread.

Reverse angle

## Optimized for Filling

Filling couplers are available with vented exhausted, such that air displaced from a container being filled can be ducted away in a closed system for subsequent processing.

## 3 Cam or 4 Cam

The 3 or 4 cam options enable dedicated system connection so that incompatible products cannot be processed through the same equipment.

## Viton or EPDM

Industry standard seals made from Viton or EPDM.

## Replaceable Seals

Seals can be replaced with kits supplied from CypherCo Ltd.

## Activation Lever

Robust and ergonomic handle which locks securely and releases positively.

## Viton or EPDM

Pad and ring seal gaskets available in the industry standard of Viton and EPDM.

## Back Pressure Relief

An integrated Back Pressure Relief avoids pressure pulse telegraphing to critical pump equipment.

## Industry Standard Build

Rugged construction to survive the challenges of operating in Agricultural, Liquid Handling and Pharmaceutical industries.

1" swivel-type outlet/inlet with NPT thread.

Reverse angle

## Optimized for Discharging

Back-pressure relief is standard on all discharge couplers.

## 3 Cam or 4 Cam

The 3 or 4 cam options enable dedicated system connection so that incompatible products cannot be processed through the same equipment.

## Viton or EPDM

Industry standard seals made from Viton or EPDM.

## Replaceable Seals

Seals can be replaced with kits supplied from CypherCo Ltd.
